About Me

Dedicated software developer specializing in backend engineering and mobile solutions. Experienced with Flutter for mobile apps and PHP (Laravel, Express.js) and Node.js for robust backend systems. Skilled at writing clean, maintainable code and designing scalable architectures. Proficient in modern UI design using Tailwind CSS to create user-friendly interfaces. Passionate about crafting efficient, high-impact digital products and transforming ideas into scalable solutions that drive business growth.

Experience

Intern – FullStack Developer (August 2024 – November 2024)

- Contributed to the company's web platform by implementing features such as a fingerprint-based attendance system and a Jira-like project management tool.
- Employed PHP (Laravel) and JavaScript frameworks to enhance backend functionality and ensure robust data processing.
- Collaborated with senior developers in an agile team, adapting rapidly to new technology stacks and tools.

Intern – Mobile Developer (June 2025 – September 2025)

- Developed and deployed large-scale mobile app modules using Flutter (including tourism and public service features).
- Designed and implemented user interfaces and managed RESTful API integrations to ensure seamless app functionality.
- Built a complete e-commerce Flutter app for pet products, handling end-to-end product listings, cart, and checkout flows.

Projects

ThreadLoop (Social Media Web App):

Developed a modern social networking platform using Laravel and Livewire, enabling users to share content, interact, and connect. Designed backend APIs and interactive front-end features for dynamic user engagement. (Live demo: threadloop.web.id)

Languages

- Indonesia – Native
- English – Intermediate

Skills

- **Backend:** PHP (Laravel), Express.js (Node.js)
- **Frontend/Mobile:** Flutter, React.js, TypeScript, Tailwind CSS
- **Database**: MySQL, PostgreSQL
- **Tools**: Git/GitHub, Postman
- **API**: REST API, Integrasi API

Education

- SMKS Al-Intisab Patokbeusi (2022 – 2025)
  Software Engineer (Rekayasa Perangkat Lunak)
